

The Spangle Jelly Chart

ABOUT THE SPANGLE CHART:

At Spangle Jelly, we know that choosing the 'next move' can be daunting – we've all been there ourselves.

The best thing to do is to try to figure out what you want from a job. We've prepared the Spangle Chart to help you visualise your preferences, and from there you can figure out what best matches them. Shade the columns to the level you feel it is important to you, BUT no two can match (5 is most important, obviously).

CATEGORIES:

Money: We want more money, but there's always a catch. Are you prepared to work longer, harder or antisocial hours for it? Would you do a duller job for more money? It's not easy...

Independence: Independence relates to the working environment. Do you want to work closely with others, or do your own thing?

Creativity: Its up to you what this means. If we think about this in a marketing context, it could mean the power to decide on a brand style, or it could mean the power to implement it in your own way. Or, you may prefer a more 'right and wrong' approach.

Impression: Your workplace affects you, but how important to you is it to affect it?

Flexibility: Do you prefer the stability of a 9-5, or do you prefer (or need) a job that changes day by day?
